

LIWAA ALJARAMANI

Aley, Mount Lebanon, Lebanon

Phone: +961 81 751 192 | Email: lewaamalaeb122@gmail.com

PROFILE

A highly motivated and detail-oriented Computer Science and Robotics enthusiast currently pursuing a Bachelor in Business Computing. Possesses strong foundations in programming, system design, and analytical problem-solving, with hands-on experience in real-world applications. Demonstrates the ability to bridge technical knowledge with practical implementation through projects involving web systems, database architecture, and role-based platforms. Passionate about robotics, automation, and intelligent systems, with teaching experience that strengthens communication and the ability to explain complex concepts clearly. Seeking to further develop advanced technical and engineering skills in a challenging academic environment.

EDUCATION

Lebanese University – Faculty of Technology

- Bachelor in Business Computing (Expected Graduation: June 2026)

BT3 – Accounting & Informatics | Final Score: 17.65 / 20

TECHNICAL SKILLS

- Programming Languages: Java, Python, C, C#
- Concepts: Object-Oriented Programming (OOP), Data Structures, Algorithms
- Database: SQL fundamentals, data handling
- Web & Systems: REST API basics, AJAX concepts
- Tools: Microsoft Office, Git (basic), Hardware fundamentals

PROJECTS

Identica – Dental Clinic Management System

- Designed and developed a full-stack web platform for managing clinic operations
- Implemented a role-based access control system (Admin Dentist, Dentist, Assistant, Patient)
- Structured and designed databases for appointments, medical records, and users
- Applied REST API and AJAX techniques for dynamic data handling
- Focused on scalability, system architecture, and real-world workflows

Blood Donation Management System (ASP.NET)

- Developed a web-based system for managing blood donors and requests
- Implemented backend logic and database connectivity
- Designed user interfaces for ease of interaction
- Strengthened understanding of full application flow and system structure

PROFESSIONAL EXPERIENCE

Accounting & Data Entry – Bashar Market (2023–2024)

- Managed financial records, invoices, and payments
- Ensured accuracy in data entry and reporting
- Maintained organized financial documentation

Sales Executive – Al-Bahaa Store (2022–2023)

- Handled customer relations and complaints
- Managed stock and inventory systems
- Contributed to store organization and sales improvement

Teller & Customer Service – Money Transfer Services (2020–2021)

- Processed local and international transactions
- Handled financial operations and reporting
- Maintained accurate transaction records

TEACHING & ROBOTICS EXPERIENCE

Private Tutor – Mathematics & Physics (2024–Present)

- Taught students (Grades 2–7) with adapted teaching methods
- Improved academic performance and understanding
- Built strong logical thinking skills in students

Robotics Instructor (Introductory Level)

- Introduced robotics concepts and basic programming
- Encouraged problem-solving and logical thinking
- Conducted simple hands-on activities

CORE COMPETENCIES

- Analytical Thinking
- Problem Solving
- Adaptability
- Communication Skills
- Fast Learning Ability

LANGUAGES

- Arabic: Native
- English: Professional
- French: Basic

INTERESTS

- Robotics & Automation
- Artificial Intelligence
- Technology & Innovation
- Sports & Fitness
